Magento, Gulp, IA, responsive design, mobile first, JavaScript, AJAX, JQuery, building apps with PHP5 and MySQL, accessibility

NEXT

Usability, semantic, UX Design, Joomla CMS, CodeIgniter (framework), Zend (framework), Laravel (framework), Symfony (framework)

SIDE PROJECTS

Be Urself (www.beurself.com)

Since 2007, I take care of design, graphics, programming, team management and content of my side project concerning music. Built first in ASP 3.0, I'm now working on a new version using PHP, MySQL and HTML5 and basing it on a PHP framework (CodeIgniter).
This project, apart from the important cause it supports, has been very important in my professional growth.
